

XTON: MASTER CLEANER**Color:** stainless steel**Version:** MC 1000**DEVICE DESCRIPTION:**

It works in a closed circuit at a temperature of up to 45 degrees C. The effectiveness of washing is increased by the XTON Active Cleaner fluid and the appropriately selected temperature and pressure from the gun nozzle. Standard equipment includes a compressed air gun and a low pressure overflow brush. The 90-liter tank is thermally insulated, which prevents the heated fluid from cooling too quickly. The washer chamber is pneumatically lifted, and the adjustable height ensures comfortable use.

**TECHNICAL DATA:**

Weight	200 kg
External dimensions – opened chamber	125 x 85 x 235 cm
External dimensions – closed chamber	125 x 85 x 170 cm
Chamber dimensions	99 x 74 x 64 cm
Heated liquid tank	90 liters
Working temperature	to 45° C
Voltage	3 x 400 V
Max power	7,5 kW
Working pressure	6 – 8 bar
Pump working pressure	140 bar
Double liquid filtration system	yes
High pressure lance capacity	to 15 l/min
Air connection	pneumatic quick coupler DN 7.2, connector
Expense of hand washing with the overflow brush	to 5 l/min
Double foot switch	tak
Security	temperature sensor emergency safety switch limit switch
